FALLOWES, 1636.

A new Almanack and Prognostication, for the yeere of our Lord God, 1636.

And from the Creation, 5585.

Being Bissextile or Leape yeere.

Calculated especially for the Latitude and Meridian of the ancient Shire-towne of Nottingham: and may very well serve for most parts of great Brittaine.

Longitude 24. degrees, 6. minutes.
Latitude 52. degrees, 54. minutes.

By EDWARD FALLOWES, Well-willer to the Mathematicks.

LONDON,
Printed by E. A. for the Company of Stationers.

Common or Vulgar Notes for the yeere 1636.

The Iulian or Englisſh account uſed in Great Brittaine, } 1636 { The Gregorian or Romane account uſed beyond the Seas.

Times of Marriage prohibited by the Church.

Adventus Domini bids refraine,
And *Hillary* ſets thee free againe.
But *Septuageſima* ſayes thee nay,
And good Low-ſunday ſayes thou may.
Rogation wanders bids thee tarry,
But holy *Trinity* bids thee marry.

From after { Advent, / Septuageſima. / Aſcention } till { the 12. Iann. / 8. day. / aſt. Eaſt. / Trinitie. }

A perfect Table of the foure Termes, and their Returnes, drawne for this present yeere, 1636.

Hillary Terme begins January 23. ends Febuary 12

Returne dayes, or dayes of Esloyne.		Dayes of Exception		Returna Brevium.		Dayes of Appearanc.

Note that the first and last dayes of every Terme are the first and last dayes of appearance.

The Exchequer openeth 8. dayes before any Terme begin, except Trinity Terme, in which it openeth but 4. dayes before.

The Anatomie of Mans body, as the parts thereof are governed by the 12. Celestiall Signes of the Zodiack.

♈ Aries, Head and face.

♉ Taurus, Necke and throate.

♋ Cancer, Brest, stomach and ribs.

♍ Virgo, Bowels and Belly.

♏ Scorpio, Secret members.

♑ Capricor. The Knees.

♊ Gemini, Armes and shoulders.

♌ Leo, Heart and backe.

♎ Libra, Reines and Loynes.

♐ Sagitarius, The Thighs.

♒ Aquarius, The Legges.

♓ Pisces, The feete.

In every moneth is 9. Columes, in the first to the left hand is contained the number of dayes by Arethmeticall figures. In the second is contained the dayes of the weeke. In the 3. is contained the Festivall dayes of each moneth, with Terme dayes, and other dayes of note, In the 4. is contained the signes and degrees that the Moone move h under, every day at noone, and are Englished in the Anatomy above. In the fifth is contained the houre and minute of Sunne rising for every day in the yeere: which being doubled sheweth the length of the night following. In the sixth is contained the houre and minute of Sunne setting for every day in the yeere, which being doubled, sheweth the length of the day last past. In the seventh is contained the age of the Moone. In the 8. and 9. is contained the day of the moneth, the weeke dayes, and Dominicall Letters, according to their account beyond the Seas.

) Second quarter the 5. day, 5. min. past 10. before noone.
○ Full moone the 12. day, 25. min. past 7. in the morning.
(Last quarter the 20. day, 8. min. past 6. in the morning.
● New moone the 27. day, at 10. of the clock at night.

Fallowes. 1636.

A New and plaine Prognostication for this present Yeere of Grace, 1636.

And from the Worlds Creation, 5585.

Being Bissextile or Leape Yeere.

Wherein are contained many things of note, with a Tide Table, and a Table of all the Kings and Queenes since the Conquest; Also you may observe a briefe Chronologie of yeeres; a Description of all the Eclipses of the Sun and Moone, with a Type of the Moones Eclipse in *England* this yeere (if the ayre be cleere.) And a Description of the 4 Quarters of this Yeere; and some Physicall Notes, and Notes briefly of Husbandry, and Gardening; With a Note of all the principall Faires in *England* and *Wales*.

By *Edward Fallowes* Well-willer to the *Mathematickes*.

Eccles. 11. 4.

He that observeth Wind, shall not sowe.
He that regardeth Clouds, shall not mowe.

Imprinted at *London*, for the Company of *Stationers*, 1636.

A briefe and easie Method to find the time of high water, in most of the Havens of this Kingdome, and Countries adjoyning.

The Names of the Havens.

Callice, Calsho, Rye, Winchelsey.	11	15

To know the time of the Tide or full Sea in any of the Havens above-named, doe but adde the houres and minutes adjoyned here to the Poyzts in this Table contained, unto the Moones comming South, found by the little Table following, produceth the times of the Tides in the same Poyzts.

Remember that the Moone, from the change to the full, shee comes to the South after noone, and from the full to the change, she comes to South before noone.

Note also, that 60 min. make an houre, 30 min. halfe an houre, 15 min. a quarter.

The

The Moons age.		Her cõming to South.	
dayes.		hou.	mi.

13	28	10	24
14	29	11	12
15	30	12	00

A Table of the age of the ☽, and her comming to the South point.

But if the houres and minutes aforenamed in these Tables, being added altogether, amount above 12 hou. cast the number 12 away, the remainder is your desire, but if all being added together they rise under 12. then that which commeth of the addition, is the time of high water in that Haven or Port.

Example, this yeere 1636 January the 1 day, I finde the age of the Moone in the Kalender before, and I find it 3 daies old, then I seeke the same age in the first or second columne in this little Table under this title (the Moones age) and answering to the same 3 in the third column under the title (her comming to South) 2 houres 24 min. the same day I desire to know the high water at London, Tinmouth, Hartlepoole, Biscay, Britaine, Gascoigne, Galicia, Portugall, to these Havens I must adde the 3 hou. 00 min. which stands against them in the little columne in that Table, so haue I 5 houres 24 min. (or 5 of the clocke and 24 min afternoone) the time of high water that day at London or any of these Havens; the same and like order is to be observed in all, and you must note again, if you would know at what time it will be high water at Calice, Rye, Callho, &c. and the Moone 29 dayes old, her comming to the South is at a 11 a clock 12 min. and the 11 hou. 15 min. belonging to Calice, &c. you must adde them together and they make 22 hou 27 min. you must cast 12 houres away, there will remaine 10 hou. 27 min. So that it is high water at Calice, Winchelsey, &c. at 10 a clocke 27 min. in the morning. And so of all the rest.

A plaine and eatie Table shewing the beginning, continuance, and ending of every Kings Reigne since the Conquest, with how long it is since the *ending of any of their Reignes, till this present Yeere*, 1636.

God blesse *Charles* our Soveraigne King,
The Queene, the Prince and their Off-Spring.
God blesse Great Britaine with grace and peace,
I say Amen, and so will cease.

Of

Of all the Eclipses which shall happen this present yeere of our Lord God, 1636.

The 2 Luminaries this yeere will suffer 4 times the losse or retection of ☽ light, which they usually impart to ☿ earth, twice the Sun, and twise the Moon, whereof the first Eclipse of the ☽ will be seen upon our Horizon in England in this forme if the ayre be cleere, but the other three will not but in other Nations.

The Type belonging to the first Eclipse of the Moone.

Upon the 10 of February, according to our English account, but in the reformed account, on the 22 of the same moneth, will appeare in our Horizon a visible Eclipse of the Moone; the beginning of it will be at 39 min. after 8 a clocke at night, the middle at 19 min. past 10, and the end just at midnight: From the beginning to the ending is 3 houres 21 min. she being at that instant placed in 3 degree of Virgo, and diametrally opposite to the Sun, (neere the tayle of the Dragon) in a signe of the earthly triplicty naturally cold and drye, of complexion melancholicke, feminine, meridianal, common, the house of Mercury and also his exaltation. The parts or digits eclipsed is three and almost 20 minutes.

Of the first Eclipse of the Sunne.

There will appeare a very great Eclipse of the Sunne, but not in our Horizon, upon the 27 day of Ianuary, according to our English account.

but in the reformed account, on the 6. of February: this Eclipse will appeare unto the people that inhabit neere the great Ocean, which is called the Sea Del Zur, and all those adiacent parts, as Peruvia, Magellanica, Nova Guinea, or new Guiana, in the longitude of the earth 243. parts, 23. min. and in the North latitude 45 degrees; it beginneth with them 52 minuts of an houre, 30 seconds after mid-day. The whole duration from the beginning to the end will be 2. houres 35. minutes 45 seconds. The points or parts eclipsed are 11 minutes 7. seconds 22.

Of the second Eclipse of the Sunne.

There will visibly appeare another great Eclipse of the Sunne in the longitude of 156 parts of the earth, and in the Septentrionall latitude 41 degrees: it will be seene of them that dwell in Lituania, Moscovia, Rezania, in great Tartaria, in the kingdome of the Persians, &c. And it happeneth to them the 22 day of July, being Friday in the night at 3 a clocke, 53 min. 56 seconds after midnight according to our account, but to them the first of August. The whole duration is two houres 37 min. The degrees or digits eclipsed are 11 min. 22 seconds 12.

Of the second Eclipse of the Moone.

Upon the 6 day of August, according to our computation, but by the reformed computation the 16 day of the same month, the Moone will again be eclipsed, by the direct interposition of the earth betweene her and the Sunne or our sight, shee will begin to be eclipsed the day aforesaid being Saturday, at 2 a clock 38 min. afternoon (but not in England) the middle is at 3 a clocke 20 minutes

the

the end at 4 a clocke one minute, from the beginning to the ending is one houre 13 minutes. The poines or digits eclipsed are 2. and 25 minutes. She being at that instant placed in the 25 degree 59 min. of the Aeriall, hot, and moist signe Aquarius, sanguine masculine of the day fixed, the day house and ioy of Saturne, she being not farre from the Dragons head. This Eclipse will be seene of all them which inhabite from the 46 part of the earth, unto the longitude of 240 parts, and Nottingham is but 24 degrees 6 min. and therefore cannot be seene upon our Horizon.

Of the Foure Quarters of the Yeere, and first of the Winter.

Winter which by good reason and indeed, doth alwayes commence and take his beginning according to Astronomy in December, and in this our age it takes its beginning the last yeere the 11 day of the same month, at 11 houres 33 min. 50 seconds afternoone, for at that time the last yeere 1635 the Sun entred into the first scruple of the earthly, cold, and dry, melancholy, and moveable signe Capricorne, at which time the Sunne doth give least portion of sun-shine to us in this Northerne part of the World, and consequently causeth shortest daies and longest nights. Now there remaineth something more to be spoken of Astrologicall judgement of weather, sicknesses, plenty, dearth, &c. but all such predictions I will leave to them which are better experienced.

Of the Spring Quarter.

The Spring Astronomically beginneth this yeere 1636. the 10 of March, at three minutes to the

the morning, at which time the Sunne steppeth under the first scruple of the fiery, hot, and drye, cholericke, oriental, moveable, and equinoctiall Signe Aries, making then our dayes and nights of an equall length, betweene Sun and Sun.

Now Mars and Sol opposite are in Aries face,
It bodes good to some, but many it will disgrace

Of the Summer Quarter.

Summer quarter Astronomically, taketh its beginning this yeere the 11 day of Iune at 3 a clock 50 min. 40 seconds in the morning, at which time the restlesse Sunne climing under the first scruple of the watery, cold, and moist, flegmatick, septentrionall and moveable signe Cancer: Hee hath now for this yeere finished his largest and Northerne Progresse, hee maketh with us the longest dayes and shortest nights in all the yeere.

Of Harvest Quarter.

Autumne Quarter Astronomically begins this yeere the 12 day of September at 6 a clocke 20 min. 43 seconds: at which time the regall Planet Sol entreth the first minute of the Aery, hot and moist sanguine, and moveable signe Libra, making our second Equinoctiall of equall day and night to us Artick or Northerne dwellers.

Chosen times for taking of medicines, and for letting of blood, as followeth.

FOrasmuch as the body of Man is daily subiect to many diseases and infirmities, for the prevention, as well as the cure thereof, great care and diligence are required.

Therefore it is convenient to give these few rules here ensuing, both for Bleeding, Purging, Bathing, Sweating, and Dyet. Notwithstanding,

ding, I wish thee not to use them but as necessity shall enforce, and then not without the counsell of the best learned, and most honest Physitian, (but give God the glory.) Now it is to be considered how it standeth with the Patient inwardly for his complexion and age, and outwardly for the time of the yeere, time of the day, and dyet.

For the complexion, let blood ♄	Flegmaticke,	♒	Aries or Sagit.
	Melancholick,	♋	Libra or Aqua.
	Cholericke,	♌	Cancer or Pisc.
	Sanguine,	♍	either of them.

For his age, let blood in	Youth, from the change to the 2 quarter,
	Middleage, from the 2 quar. to the full.
	Elder age, from the full to the 3 quarter.
	Old age, from the 3 quar. to the change.

Time of the yeere.

Spring good, Autumne indifferent.

For the time of the moneth.

Let not blood	The ☽ in Taur. Gem. Leo, Virgo, or Capr.
	The day before nor after ♄ change & full.
	12 houres before and after the quarters.
	The ☽ with ♃ or ♂ evill aspected.

Time of the day.

Morning after Sun-rising, fasting afternoone, after perfect digestion; the ayre temperate, the wind not South.

Dyet after bleeding.

Sleepe not presently, stirre not violently,
Use no venery, feed thou warily.

Cautions to be observed.

Notwithstanding, for the Phrensie, ♄ Pestilence, the Squinancie, the Pluriſie, the Apoplexie, a continuall head-ach; growing of choler or blood, a hot burning fever, or any extreme paine, in this case a man may not tarry a chosen time, but incontinently, with all convenient speed, he is to seeke his remedy, but then blood is not to bee let in so

great

great a quantity, as if a chosen time might not be respected.

Doe to { Prepare humours, Vomit, Purge by neezing, Take Glisters, Take Gargarismes, Stop rheumes & fluxe, Bath for cold diseases, Bath for hot diseases } the ☽ in { Gem. Lib. or Aqu. Aries Tau. or Cap. Can. Leo or Virgo Aries, Lib. or Scor. Cancer or Aries, Tau. Virg. or Cap. Aries, Leo or Sag. Can. Scor. or Pisc. }

Purge with { Electuaries, Potions, Pills, } the ☽ in { Cancer, Scorpio, Pisces. }

Of Bathing.

The ☽ in { Libra or Pisces, Aries, Leo, or Sag. Can. Scor. or Pisc. } Bath { For cleanlinesse, In cold diseases, In hot diseases. }

Of Sweating.

In Sweating as in Bathing, use all skill;
If cold thou take, the danger is as ill.

Husbandicall Elections.

Plant and graft the ☽ increasing ♉ or ♒, the Wind not East.

Fell Timber from Midsummer till Christmas the ☽ increasing.

Cut your Vines in February or March.

Fell Coppice and fewell, the ☽ in first quarter.

Remove Trees, ♄ ☽ in last quarter in Novemb.

Sheare Sheepe, and cut the haire to grow, the ☽ increasing.

Kill Beeves and Swine neere the full ☽.

Set or sowe Onyons, Garlick, Parsneps, Carrets, Beans, Pease, and such like, after the full ☽.

Gather Apples, Peares, &c. neere the full ☽ in dry weather.

The

FINIS.

An Abstract of a direction, concerning *Real Contracts.*

WHosoeuer shall desire to purchase, or put to Sale, to take in Lease, or let to Farme, to Grant, Assigne, Exchange, or otherwise to Contract, or deale, with or for any Lands, Leases, Rents Annuities, Mansion-houses, Offices saleable, or other Estates, of what yeerely value soeuer, or to saue any such from danger of Forfeiture, through the want of present money: May either in their owne names, or in the name of any other trusted by them, haue secure meanes, with all priuacy requisite, for the speedy effecting what shall be desired, in any the Cases aforelaid, or the like: At the Porchs-house against St. *Andrewes* Church in Holborne, *LONDON.*

God saue our gracious King CHARLES.

BIBLIOTHECA LAMBETHANA
